Rich/Rich/Kelley,

The Regional Labs have gotten back with me and they will be able to provide analysis for then remaining 3 homes.

Region 2: MBAS  
Region 9: Dissolved gases, GRO  
Region 6: Ethylene glycol/propylene glycol (modified 8270D)  
NAREL: RAD parameters.

When you can definitively provide me with the sampling dates, please let me know so I can forward.

To track and document this sampling event

-- we need Techlaw to send requests for the three remaining homes. These can be identical to the March sampling event.

-- we need Techlaw to send requests for the re-sampling of the four homes for metals only. Include lead (Pb) in the list and remove method 245.1.

Thanks,

Stevie Wilding, Chemist
